These specifications have been prepared and are intended as a general guide to the aircraft. AeroTrust cannot, however, be liable for any inaccuracy. It is up to the purchaser to confirm details of concern by survey, inspection and/or inquiry of the seller and to ensure that the purchase contract properly reflects client's concern and specific details upon which they may rely. AeroTrust Corp always advises an independent survey to be performed on behalf of the Purchaser.

Avionics/Radios

The Garmin® G3000™ is an integrated all-glass avionics system providing flight instruments, navigation, communication, lighting controls, traffic, terrain, weather, aircraft systems status and alerting, checklists and other functions. Three (3) Primary Flight Displays (PFDs) and Multi-Function Display (MFD) present flight instrument data and pilot-selectable information in a 40:60 ratio split screen. Dual Touchscreen controllers provide the primary point of access for the majority of all avionics data inputs and selection. The integrated avionics provides for enhanced situational awareness, functionality, ease of operation, and redundancy.

Dual Extended Squitter Transponder and ADS-B (OUT) Functionality

Radar Altimeter
